FISCAL ANALYSIS

ASSUMPTION

Officials of the **Department of Revenue (DOR)** state this legislation would not have an administrative impact on its agency.

Officials from the **Office of Administration - Budget and Planning (BAP)** state this proposal would expand the state sales tax exemption for certain types of telecommunication services. BAP has not been able to find any empirical basis to estimate the fiscal impact of this proposal. This bill has no fiscal impact on BAP.

#Officials from the **Department of Economic Development, Division of Public Service Commission (PSC)** assume this legislation would not fiscally impact their agency. In addition, current federal and state law require telecommunication companies to itemize all regulated and non-regulated services on the customer's bill. Therefore, PSC assumes this bill would have a zero to minimal revenue loss impact on total state revenue.

#**Oversight** assumes the revenue loss from this change in sales tax exemption for telecommunications services would be zero.

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

DESCRIPTION

Under current law, telecommunication service charges are exempt from sales and use taxes only when separately stated on the customer's bill. This bill allows those charges to also be exempt if the provider separately states the charges in the provider's business records.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
